

Water Bottle Pouch 003 (Black)

PM-WBP003-BLK

GENERAL DESCRIPTION

The Peacemaker Water Bottle Pouch 003 (PM-WBP003-BLK), is designed to securely carry a wide variety of water bottle shapes and sizes in the field.

The pouch is designed for standard 750ml water bottles, however the elastic shock cord closure, retention strap and mesh expand for larger and smaller bottles to be stashed in the pouch.

The pouch can be quickly opened and closed with the elastic shock cord opening and securely closed with the cord lock.

An elastic strap around the mid-section of the pouch puts pressure on the water bottle within, securing it in place and stopping the bottle from moving within the pouch or falling out if the closure has not been secured.

The rear of the pouch features robust PALS/MOLLE attachment and a 50mm/2" belt loop, laser cut from Squadron fabric. The pouch can be securely mounted to a duty belt, body armour carrier or any platform with PALS/MOLLE.

DETAILS
